Application Appliance

GENERAL DESCRIPTION

The AIS-100x is Audiotec's appliance in an Audiotec Intercom System. Fitting into a single rack mount unit, this device handles all the calls, configurations, and communication to Modbus and the PLC. Based on Non-Proprietary/Open Source and Open Standard SIP & MQTT protocols. The extra RAM of the Enterprise upgrade allows for more calls and stations to exist on a single appliance, while the extra storage from the SSD allows for more events to be logged and stored.

FEATURES and SPECIFICATIONS

- 100-240Vac, 50-60Hz, 2.6A max, 200 W Power supply
